MotorStreet® 360 for Automobile Dealers

Automate your car inventory TODAY. Sell more vehicles TOMORROW.

What is MotorStreet®?

MotorStreet® is an American, international 360° virtual car capture merchandising platform providing custom car photo studio booths, car spin camera kits, VDP automation and hands-on training taught over Zoom.

What does MotorStreet® do?

MotorStreet® designs and builds custom car photo studios for medium and larger automobile dealers. For smaller dealers including Buy Here Pay Here (BHPH), we provide affordable car camera kits for capturing exterior car spins and interior 360° views from your new or used inventory.

Your 360° inventory is automatically pushed in real time to your VDPs and we can connect your MotorStreet® back office to HomeNet, vAuto and most DMS platforms including Dealer.com, Dealer Inspire and others.

Why choose MotorStreet®?

Experience counts. MotorStreet® was founded in 2009 and serves automobile dealers, trucking companies and heavy equipment customers world-wide. Our platform can be custom tailored to your dealership and we offer a white label version including the iOS app.

MotorStreet® is a division of VPiX® which was ranked 214th BEST Company in America by Entrepreneur magazine.
